Winnebago Tribe of Nebraska

• Current Brownfields Tribal Response 128(a) Grant Projects

  ➢ Site 1 – Water/Boiler Plant

  ➢ Site 2 – Abandoned house, mobile home, shed
Site 1 – Water/Boiler Plant
Cinder Block Building constructed in 1952. Five - ASTs ranging from 10’, 12’, and 14’. Site at a later date was enclosed.

Sand Filtration Media with pipe leading out back of building where contaminants were flushed out down the hill close to a creek and railroad tracks. Targeted Brownfields Assessment (TBA) Project. Future Recycling Center.
Site 2 - Abandoned house, mobile home and shed - BIA Road #17.
Current Brownfields Tribal Response 128(a) Projects

- EPA was conducting a Targeted Brownfields Assessment on Site 1 (Water/Boiler Plant). Phase I has been completed and Phase II planned for - May 24, 25, 2012. This will be a shadowing event as two Region 7 Tribes have been invited and will be attending this sampling project.

- Over Easter break, someone decided to burn Site 2 Structure (Old house, mobile home and shed) with presumed Lead-Base Paint (LBP) and Asbestos Containing Materials (ACM).

- So, that put Site 2 Structure in emergency status. Instead of completing a Phase I and Phase II Assessment, we were in emergency status with a remediation as there are residential owners on each side of this property.

- Now I am currently working on both sites here on the Reservation.
Site 2 – Abandoned Property after the Fire - Easter 2012. I enclosed structure for safety reasons and looting was occurring. In negotiations currently with getting site cleaned up. Posted a Legal Notice announcing Request for Proposals (RFP).
