The College of Engineering at K-State has many unique scholarship opportunities for our out-of-state students. We understand that the cost of higher education continues to increase and we will do everything we can to make each student’s college education as affordable as possible. Outside of the $2.5 million dollars in scholarships that our students are able to apply for when they are a student on campus, we have many University and College scholarships for our out of state students. An overview of all out of state scholarships is available for your use.

Along with the University Scholarships, we have the Engineering Initiative Scholarship. To get the Engineering Initiative Scholarship, a student must be admitted to K-State, must enroll in a College of Engineering degree program, and also apply for scholarships by November 1 of their senior year. (www.k-state.edu/sfa/scholarships/)

**ENGINEERING INITIATIVE SCHOLARSHIP ADD ON**

24-27 ACT / 3.5 GPA or 1090-1240 SAT / 3.5 GPA  
$2,000 Renewable for 4 years ($8,000 total)

28+ ACT / 3.5 GPA or 1250+ SAT / 3.5 GPA  
$4,000 Renewable for 4 years ($16,000 total)

This is an add-on scholarship for the:

**Heritage Scholarship**

$32,000 renewable scholarship over four years. One parent or grandparent (biological or adopted) must have graduated from K-State. Awarded to graduating seniors with a minimum 3.0 high school GPA. Eligible students receive $8,000 per year. Renewable for up to three additional years with a minimum 3.0 K-State GPA.

**Purple and White Scholarship or Honor’s Scholarship**

$32,000 renewable scholarship over four years. Awarded to out-of-state graduating seniors who have a minimum 3.5 high school GPA and 24 ACT (1090 SAT). Eligible students receive $8,000 per year. Renewable for up to three additional years with a 3.5 K-State GPA.

**Midwest Student Exchange Program (MSEP)**

The MSEP reduces student tuition by a significant amount. Eligible students pay 150% of in-state tuition. Students must be a resident of Indiana, Illinois, Michigan, Minnesota, Nebraska, North Dakota, Wisconsin, or Missouri and have a minimum 3.5 high school GPA and 24 ACT (1090 SAT). Student must also be enrolled in one of the following degree programs: Architectural Engineering, Biological Systems Engineering, Construction Science and Management, Industrial Engineering, or Mechanical Engineering. MSEP is renewable for up to three additional years with a minimum 3.0 K-State GPA.

For example, if a student has a 26 ACT (1190 SAT) and a 3.5 HS GPA, the student at a minimum would receive an $8,000/yr scholarship plus $2,000/yr for engineering totaling $10,000/yr ($40,000 over four years!). If the student has a 30 ACT (1330 SAT) and a 3.5 HS GPA, the student at a minimum would receive an $8,000/yr scholarship plus $4,000/yr for engineering totaling $12,000/yr ($48,000 over four years!)

For students who are interested in Architectural Engineering and live in Missouri, there is the Missouri Reciprocal Tuition Agreement. The Missouri Reciprocal program offers in-state tuition to eligible students pursuing an Architectural Engineering degree and have a minimum 3.5 high school GPA and 24 ACT (1090 SAT). Missouri Reciprocal status will remain with a student as long as they are in good academic standing with the College of Engineering. Engineering Initiative does not stack on top of this tuition waiver.

There are many great scholarships which help make K-State an affordable option for out-of-state students. If you have questions regarding engineering related scholarships, please contact the College of Engineering by emailing kstateengg@k-state.edu or calling 785-532-5455.
