In 2014, 36 faculty documents, totaling 1,190 pages, were edited. Since fall 2013, Tamara has facilitated five on-campus editing workshops that served on the K-State Foundation Board of Directors. He and his wife, Mary, a K-State human ecology graduate, visited with many administrative, faculty and student groups during their visit to campus. The lecture “Building great leaders — lessons from the railroad industry: driving a more engaged and productive team through leadership development” was held in Fiedler Auditorium to a standing-room-only crowd. It’s available for viewing at the following website: engg.ksu.edu/ergp/lectures/eyestone/bio/ice.html.

College of Engineering Eyestone Lecture

The College of Engineering was honored to host Carl Ice, a K-State 1979 industrial engineering alumn and current president and chief executive officer for BNSF Railway, for the Eyestone Lecture on March 10, 2015. Ice was appointed as CEO of BNSF in January 2014 after serving in the role of president and CEO for more than three years. He has served on K-State’s Engineering Advisory Council and is currently serving on the K-State Foundation Board of Directors.

Our editor, Tamara Robinson, earned a B.S. in secondary education, English, from Kansas State University. In 2008, the department of biological and agricultural engineering at K-State hired Tamara as an editor for academic and extension publications. Her editing experience expanded when, in 2013, the K-State Engineering Research and Graduate Programs launched a pilot program offering free editing services to College of Engineering faculty and graduate students. Tamara became the editor for that program. Support and utilization of editing services have caused the program to evolve from an experimental pilot program to a permanent resource for engineering faculty, staff and students.

ERGP Newsletter
April 1, 2015

Upcoming events

4/6 — Graduate Student Appreciation Week
4/6 — ERGP Open House with Associate Dean Schule for COE grad students
1048 Rathbone Hall, 8:00 - 10:00 a.m.
4/8 — Graduate School Ice Cream Social
East side of Fairchild Hall, 1:30-3:00 p.m.
4/8 — Graduate School Graduate Student Awards and Recognition Mixer
Union Main Ballroom, 5:00 - 7:30 p.m.
4/9 — Working with Industry Boot Camp: Developing and Managing the Outcomes of Your Project
Alumni Center, Banquet Room A, 2:30 - 4:30 p.m.
4/9 — ERGP Ice Cream Social Engineering Atrium, 3:00 - 4:00 p.m.
4/10 — Deadline for COE Undergraduate Research Poster Forum
4/14 — GTA Recognition of Achievement in Professional Development
Hemisphere Room, Hale Library, 3:30 - 4:30 p.m.
4/17 — COE Untenured Faculty Network — Graduate Recruitment
1044 Rathbone Hall, 11:30 - 12:30 p.m.
4/30 — Faculty Meeting on Research - Opportunities for COE Faculty to Collaborate with NABF, BRI, NICKS and ICOM
1107 Fiedler Hall, 3:30 - 5:00 p.m.
4/30 — COE Undergraduate Research Poster Forum
Atrium, Fiedler Hall, 5:30 - 7:00 p.m.

Editing services available to College of Engineering

Did you know the Engineering Research and Graduate Programs Office provides editing services to all COE faculty, staff, graduate students and undergraduate researchers free of charge?

Our editor, Tamara Robinson, earned a B.S. in secondary education, English, from Kansas State University. In 2008, the department of biological and agricultural engineering at K-State hired Tamara as an editor for academic and extension publications. Her editing experience expanded when, in 2013, the K-State Engineering Research and Graduate Programs launched a pilot program offering free editing services to College of Engineering faculty and graduate students; Tamara became the editor for that program. Support and utilization of editing services have caused the program to evolve from an experimental pilot program to a permanent resource for engineering faculty, staff and students.

Editing services are available for the following:

• Proposals
• Academic papers
• Journal articles
• Master’s theses and reports
• Dissertations
• Posters
• Research reports
• Textbook chapters
• Undergraduate research documents

Guidelines for editing services and online editing resources including documents from previous technical editing workshops (and a webinar of “Top 10 Writing Mistakes to Avoid”), can be found at engg.ksu.edu/ergp/resources/services.html. For questions regarding ERGP editing services, please contact Tamara at tamarar@ksu.edu or 913-839-8731.

Did you know?

Here are some interesting facts about our editing services:

• In 2014, 36 faculty documents, totaling 1,190 pages, were edited.
• In 2014, 97 student documents, totaling 3,231 pages, were edited.
• Since fall 2013, Tamara has facilitated five on-campus editing workshops that provide practical editing tips as well as self-editing and group editing practice.

For more information on our editing services, please visit engg.ksu.edu/ergp/resources/services.html

Kansas State University is committed to nondiscrimination on the basis of race, color, ethnic or national origin, sex, sexual orientation, gender identity, religious, age, ancestry, disability, genetic information, military status, veteran status, or other non-merit reasons, in admissions, educational programs or activities and employment, including employment of disabled veterans and veterans of the Vietnam Era, as required by applicable laws and regulations. Responsibility for coordination of compliance efforts and receipt of inquiries concerning Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and the Americans With Disabilities Act Amendments Act of 2008, has been delegated to the Director of Institutional Equity, Kansas State University, 104 Edwards Hall, Manhattan, KS 66506-4801. (Phone) 785-532-6220; (TTY) 785-532-4807.
Office of Research and Sponsored Programs

Within the Office of the Vice President for Research, the Office of Research and Sponsored Programs (ORSP) offers a range of services, including budgeting, research communications, grant availability searches and grant writing classes to assist faculty. It promotes and facilitates the research, education, and outreach missions of Kansas State University by supporting and administering all activities involving extramurally sponsored programs.

At least once annually, ORSP offers Grant Writing 101, a three-hour workshop on proposal writing and finding funding opportunities. This office also offers information sessions on specific funding programs (e.g., NSF CAREER), submitting to NSF/NIH/USDA; responsible conduct of research and developing data management plans, as well as co-hosting instructional session with the K-State Libraries on Scopus and the Web of Science. ORSP also publishes The Funding Connection, a weekly newsletter listing recently released funding opportunities. In addition to individual list serve notifications, The Funding Connection can also be found via the VPRs RSCAD Momentum weekly newsletter.

ORSP provides faculty with support for the extra planning, logistics and work associated with larger, interdisciplinary submissions that typically include external collaborators. The office can also provide help with teaming, as well as facilitate working with minority serving institutions and finding campus resources to help meet the broader impact requirements for NSF submissions. If you are applying to a funding agency for the first time, this office can help you with program guidelines for that agency as well as with technical review support as you progress towards your submission. Individual or group information sessions on finding funding opportunities are also available.

ORSP is located at 102 Fairchild Hall. Its website can be found at k-state.edu/research/. Key ORSP contacts include Development Directors Mary Lou Marino (mlmarino@ksu.edu, 2-3211) and Joel Anderson (jdanderson@ksu.edu, 2-3455).

Attention faculty

Office of Research and Graduate Programs holds research meetings aimed to help faculty of all ranks

The ERGP Office hosted a faculty research meeting March 5 for all College of Engineering faculty. The topic, Interdisciplinary Opportunities through Engineering Centers and Institutes (Part 2), allowed participants to learn about four additional centers and groups within the College of Engineering that provide opportunities for research collaboration. This session covered the Center for Hazardous Substance Research (CHSR), Center for Sustainable Energy (CSE), Institute for Environmental Research (IER) and Engineering Extension. Past research meetings are available on the ERGP website.

The next research meeting will be April 30 in Fiedler Auditorium at 3:30 p.m. The topic will be Research Opportunities for COE Faculty To Collaborate with NBF, BRI, NICKS and ICCM. Participants will learn how engineering faculty can be more involved with the National Bio and Agro-defense Facility, Biosecurity Research Institute, Nanotechnology Innovation Center of Kansas State and Institute for Computational Comparative Medicine. Presenters will be Ron Trevyn, KSU liaison to NBF; Stephen Higgs, BRI; Nancy Monterio-Riviere and Jim Riviere, both veterinary medicine.

Safety highlight

Gibisch assumes role as first operations manager in the College of Engineering

Jeff Gibisch joined the College of Engineering Dean’s Office in January as operations manager. He received a B.S. from California State University and a M.A. from Clemson University. He has several years of business ownership and project management experience.

Gibisch will oversee job priorities as they relate to infrastructure to ensure smooth operations in the College of Engineering so that faculty, staff and students are provided a safe working environment in accordance with federal and state laws and regulations. He will be the point of contact for all engineering facilities, grounds and safety issues.

He will also transition into the College of Engineering safety coordinator role, currently held by Lisa Linck. Lisa will return full-time to the University Environmental Health and Safety Office in June.

Recent trends for COE proposals, new awards and research expenditures

Our K-State College of Engineering research activities relate to three different activities — proposal writing and submission, successful proposal funding and research expenditures. Each of these graphs tells a different story and cannot be compared directly to each other as proposal awards may span multiple years and proposals written in one fiscal year may be awarded and have expenditures in later years. However reviewing a snap shot of recent trends in these areas helps COE leaders better understand how we are doing as we move towards our K-State 2025 goals of increasing research expenditures.

The Engineering Office of Research and Graduate Programs is a resource to help faculty navigate the activities of proposal submission and identifying additional funding opportunities. Please contact ERGP@ksu.edu if you have questions.
