## Speaker Profile

Todd Wimmer is a 1995 graduate from the University of Nebraska Lincoln. Todd began his career in January 1996 in Denver, Colorado as a Field Engineer with the Southern Pacific Railroad. One year later Todd moved to Sacramento, California where he worked until May 2001. During his time in California, Todd worked as a project manager for projects in the Southern California area totaling \$150 million. Todd has worked in Wichita since May 2001 and is currently AVP of Structures and Track Assessment.

Todd has been married for 17 years and has two children. Todd is also a third generation railroader.

## ASCE Structure Profile

The Golden Gate Bridge is a suspension bridge spanning the San Francisco Bay. The American Society of Civil Engineers has declared the Golden Gate Bridge as one of the Wonders of the Modern World. Before the bridge was built the only way across the bay was by ferry.

Construction began January 5, 1933. The project cost more than \$35 million. However, the bridge was completed ahead of schedule and under budget. Until 1964 the Golden Gate Bridge was the longest suspension bridge in the world at 4200 feet. The total length of the bridge is 8.981 feet. The Golden Gate Bridge has an average daily traffic of 110,000 vehicles.
