

## What Students Are Saying

*"The MoDOT internship experience has given me a chance to apply what I have learned in the classroom. I have had the opportunity to use my skills in a professional environment, while learning from those more experienced. I will be more prepared for a career in communications, advertising, and/or any other profession, because of my time at MoDOT."*

Trevor Griswold  
Customer Relations, Central Office

*"As a result of being in the internship program I learned a lot about how the business side of government works. It also showed me how different public work is from private and the higher level of expectation that is placed on government employees and their work. I have learned how the business world works and how to work better with other people."*

Brandon Foster  
General Services, Central District

*"I learned about the processes and procedures that are required to design a road system, along with some general knowledge that I can take with me into my future education."*

Daniel Siskowski  
Highway Division, Southwest District

*"Throughout my internship I learned the value of executing high quality work in an effective manner in order to meet MoDOT's needs and delight our customers. Networking within the field and business environment has proved to be an effective way to gain respect and knowledge and build contacts that will carry on far beyond my service as just an intern."*

Aaron Utrecht  
Information Systems, Central Office

*"By being an intern at MoDOT, I learned what it is really like to be a graphic designer. They teach you the basics in college, but until I worked with real clients, I didn't know what the job entailed. I have learned that this is definitely a career I want to pursue, and I have gained a lot of experience. I am also able to build my portfolio, which will help me when pursuing future jobs."*

Allison Campbell  
Customer Relations
