The Consortium for Environmental Stewardship and Sustainability (CESAS) is a network of partner organizations choosing to work collaboratively to advance sustainability and sustainable development. Attached is a brochure that provides additional information about CESAS.

An invitation is extended to you and your organization to become a member of CESAS. Member benefits include: access to an international and interdisciplinary network of organizations and individuals with an interest in sustainability; opportunities to propose, direct and/or participate in projects; participation in future events; opportunities to work with partners on common goals; access to sustainability information and resources; and partner organizations are connected through a consortium website. Consortium dues are voluntary.

If your organization wants to be a consortium partner of CESAS, please provide the name of the organization, contact information for the person who will represent your organization, and the Internet URL of the organization.

For more information, please contact:
